PROFESSIONAL SUMMARY

Senior .NET Full Stack Developer with 7+ years of experience delivering scalable web, desktop, and cloud-ready solutions across dispatch, onboarding, hospitality, payments, reporting, and enterprise integration domains. Strong expertise in ASP.NET Core, C#, REST APIs, Entity Framework, SQL, React, Angular, Azure Functions, and secure third-party integrations. Proven record of improving onboarding speed by 40%, backend efficiency by 30%, and API response time by 25%. Working knowledge of Node.js and Express.js for lightweight services, integration utilities, and backend tooling.

CORE TECHNICAL EXPERTISE

Backend & Architecture: C#, .NET Framework, .NET Core, ASP.NET Core, Web API, MVC, Web Forms, Entity Framework, ADO.NET, LINQ, CQRS, DDD, OOP, TDD

Cloud & Integration: Azure, Azure Functions, Firebase, Stripe, JWT, SignalR

Frontend: React.js, Angular, JavaScript, SPA architecture, responsive UI integration

Delivery & Collaboration: GitHub, Bitbucket, Jira, Confluence, TortoiseSVN, Agile/Scrum

Data & Caching: SQL Server, PostgreSQL, Redis, query optimization, stored procedures

Desktop & Reporting: WPF, WinForms, DevExpress, RDLC Reports

Engineering Practices: API design, performance optimization, clean coding, debugging, code reviews, scalable application design

SELECTED IMPACT

40% faster client onboarding after leading delivery of the v2 onboarding platform.

25% reduction in API response time through architectural and query improvements.

30% improvement in backend efficiency through .NET Core optimization.

15% shorter sprint cycles through stronger Jira-based planning and delivery discipline.

PROFESSIONAL EXPERIENCE

Senior .NET Developer

Astrik Digital

Jan 2025 – Continue

Karachi, Pakistan

- Created LMS Applications, CRMs, Lead management and Book Publishing Software's.
- Lead the team and project coordination with manager and Product team.

Senior Software Developer

Salnad

Jul 2023 – Oct 2024

Remote

- Led development of client onboarding platforms v1 and v2 using ASP.NET Core, C#, React.js, and scalable REST APIs.
- Improved client onboarding speed by 40% by redesigning workflow logic, API interactions, and user-facing processes.
- Built WPF applications for NSSR client reporting and notifications, along with WinForms utilities and Azure Function applications.
- Reduced API response time by 25% through backend refactoring, query optimization, and improved application architecture.
- Worked with stakeholders and team members to translate operational requirements into maintainable software features.

PROFESSIONAL EXPERIENCE

Software Engineer

M3 Technologies

- Contributed to full-stack development of DevOps systems and hotel management platforms using .NET Core and Angular.
- Integrated Angular frontend modules with backend APIs, improving consistency across business workflows and user experiences.
- Supported enterprise application maintenance, debugging, sprint delivery, and source control using Jira and Bitbucket.
- Collaborated with distributed teams to deliver enhancements, resolve defects, and maintain release quality.

Jan 2021 – Jul 2023

Karachi, Pakistan

Junior .NET Developer

Viftech Solutions Pvt. Ltd.

- Developed and maintained complex ASP.NET Web Forms and MVC applications with QuickBooks integrations and dynamic user interfaces.
- Built reusable SPA components and JavaScript functionality to improve usability and maintainability.
- Implemented robust LINQ queries, database interactions, and backend business logic for enterprise workflows.
- Assisted with debugging, feature delivery, and application support across multiple client projects.

Jan 2019 – Oct 2020

(Remote) New York, USA

SELECTED FULL-STACK PROJECT

Digital Publishing and eBook Processing Platform

ASP.NET Core | React/Vite | SQL Server | AWS S3/CDN

- Designed and implemented a multi-step publisher workflow covering manuscript upload, cover validation, preview, sample generation, content checks, and publishing.
- Built ASP.NET Core APIs, services, repositories, and background workers with SQL Server for secure, scalable book-processing workflows.
- Developed React/Vite interfaces for EPUB, PDF, and DOCX handling, upload validation, reader previews, and publisher-facing workflows.
- Engineered secure asset delivery through AWS S3 and CDN paths, ownership-based download endpoints, and reliable manuscript metadata management.
- Implemented EPUB sample generation for text and image-based content, plus SMS/OTP verification and payment integration workflows.
- Used Node.js-based tooling and lightweight scripts in modern frontend workflows; working proficiency with Express.js REST patterns.

ADDITIONAL VALUE

- Strong ownership of backend architecture, API performance, system integration, debugging, and production issue resolution.
- Comfortable working across web, desktop, cloud, payment, reporting, and database layers in distributed teams.
- Effective communicator with experience collaborating with technical and non-technical stakeholders in remote environments.
